

MineAway Abstract

Our MoveMining idea (MineAway) is to inform our youth through an application that is advertised on social media where most of today's youth is constantly.

Our idea will change the world's perception of mining by simply showing the world all the ways that mining affects them. This will also give more information about mining to our youth about how they can help develop new ideas to bolster the future of mining.

Our intended audience is anyone 18 and under, however, it would not be a problem if anyone above 18 would use the application.

If our project were to be noticed and/or sponsored they total price of the contest would probably be \$200.00/month. About \$150.00 for the hiring of a software developer, \$50 for other expenses like transportation and camera equipment.

If there were any additional information we would like to share with the judges, it would be that we are from a line of coal miners in our family history, of great grandparents. We know and value the importance of mining.
