TOGETHER WE ARE STRONGER

comMINEnity represents the link between mining and the communities surrounding mining projects. It is the manifestation that if both concepts work together, responsible mining will be promoted for the benefit of the society. We will achieve this through conferences and the development of a mobile app, where it will be explained visually and dynamically how the current mining industry works.

Through comMINEnity we hope to reach all members of the communities close to mining projects, which is why our audience is people over 18 years old. In the first year, we will start in the rural parish of Gualal located in southern Ecuador connecting with more than 700 people. Our ambition is to be able to spread our message to more communities turning ourselves into leaders in educational transformation in mining, motivating the exchange of ideas between mining companies and communities.

Due to the current situation, the first year of the events organized by comMINEnity will be mainly online, where the costs will be for: virtual platform: \$400.00 USD, continuous app development: \$420.00 USD, multimedia material: \$200.00 USD. Giving a total of \$1020.00 USD.

We are currently waiting to close a working agreement with CORNERSTONE CAPITAL RESOURCES INC. as one of its pilot projects for Ecuador in regards of Community Relationships.
